

Quality Management Policy

Momentum Built P/L is a construction organization who's primary activities include project and/or construction management across broad and diverse sectors of the construction industry including but not limited to education, commercial extension, refurbishment and new construction, commercial fit out, residential construction and transport.

Momentum Built P/L is committed to the development, implementation, execution and maintenance of our Quality Management System. It forms the framework for our commitment to add value, maximize our efficiency and productivity and meet our organizational principles of service in the delivery of projects on time, under budget and to industry leading levels of quality.

To achieve these goals, Momentum Built P/L will implement, maintain and continually improve its Quality Management System in accordance with ISO9001:2015. The system will be applied to all projects we undertake.

This Management System is the assurance to our clients that as a service provider, Momentum Built will conduct all its business dealings with due regard to contractual, legal and regulatory requirements, providing services that consistently meet and exceed the needs and expectations of our wide and varied clients.

Momentum Built P/L believes that the provision of a quality base service provides the cornerstone for future competitive advantage, enhances our reputation and promotes our long term success, thus providing a foundation for ongoing client and employee satisfaction.

Conformance with this Management System by all Management and Staff is mandatory.

It is the responsibility of Momentum Built Directors and Senior Management to convey and communicate this quality policy to all employees within the company including but not limited to office personnel, site personnel and contract staff.
